

New Mexico Environmental Flows Workshop – March 15, 2010

We are hosting a one day workshop to address ecological conditions on New Mexico's rivers as impacted by hydrologic (flow) alterations.

The goal of the workshop is to provide stakeholders, decision-makers and agencies with some perspectives on environmental flow management, such as has been initiated in other states and countries, and ascertain the state of the science in New Mexico. The discussion will be led by a distinguished group of scientists, e-flow practitioners and local, public and private stakeholders.

The workshop will be held on Monday, March 15, 2010 at the University of New Mexico School of Law. Attached is the Preliminary Agenda and the Registration Form. A \$40.00 fee is being charged to cover expenses. If you would like to attend, please send in your registration form as soon as possible. **Seating is limited and registration ends March 1st.** If the Agenda and Registration Form are not attached, you can access them at our website, <http://uttoncenter.unm.edu/E-Flows.html>. If you have any questions, please call the Utton Center at 505-277-7809.

We would like to thank these sponsors:

Conservation Voters New Mexico Education Fund
